What You Need to Know About Janibell®

The Money-Saving Solution for Soiled Briefs

Maintaining a fresh and hygienic environment can be a real challenge for adult healthcare facilities. Most resort to individually bagging each soiled brief and then having the CNA walk down the hall to deposit each bag in a central trash receptacle – a very costly and time-consuming solution.

Luckily, there is a better way: place an attractive, odor-containing Janibell waste receptacle in each resident's room. Your Janibells will quickly pay for themselves by greatly reducing bag/liner costs and reducing the amount of time your CNAs spend on housekeeping tasks.

"Janibells are wonderful, convenient and quite a cost saver in bags. We love that we don't have to take a whole bag out for a very small amount of garbage!"

*- Kim Glover, Director of Environmental Services,
Dallas Retirement Village*

Advanced Waste Disposal for Odor-Free Environments

Each Janibell waste receptacle features a tight-sealing/self-closing lid that locks in odors, and a unique continuous bag liner system that reduces materials costs. The popular 10-gallon M330B model is an ideal size for resident rooms; each full bag holds 12 to 15 briefs with associated toweling.

Perfect for All of Your Waste Disposal Needs

Of course, soiled briefs are not the only items that get thrown away at your facility. Janibell's stand-alone trash cans – available in various sizes – help keep things clean and tidy in every room. In addition, Janibell can also be used as an odor-containing linen hamper.

See How Janibell® Pays for Itself in Less than Two Months!

1. Janibell® Reduces Your Labor Costs Day After Day

As the following chart illustrates, by placing a Janibell waste receptacle in each patient room, a 99-bed facility at which 55% of the residents are incontinent can **save \$150.00** per day in labor costs – **that's \$1050.00 each week!!**

	Process	Time per Soiled Brief Change	Time per Patient per Day (assumes 6 soiled briefs per day)	Cost per Patient per Day (assumes CNAs are paid \$10/hour)
With Current Method	<ul style="list-style-type: none"> Locate bags Individually bag and seal the waste Walk down hallway Drop bagged waste into receptacle Walk back to patient room Return to patient 	3 minutes	18 minutes	\$3.00
With Janibell	<ul style="list-style-type: none"> Drop waste into receptacle Return to patient 	15 seconds	1.5 minutes	\$0.25
Total Savings		2.75 minutes	16.5 minutes	\$2.75

With Janibell®, There is no waste.

Conventional Bag

Janibell Liner

2. Janibell® Greatly Reduces Your Materials Costs

With Janibell's flexible liner system, bags are cut to the size needed. If the unit is emptied before it is full, a full bag is not wasted. Each liner makes 30 full-size bags or many small ones. As the following chart illustrates, by placing a Janibell waste receptacle in each patient room, a 99-bed facility can **save \$170.00 per month** in bag costs – that's **\$2,040.00 each year!!**

Method	Bags or Liners Used Per Month	Unit Price	Monthly Cost	Monthly Savings
Standard Bag	10,000 Individual Bags	\$0.03	\$300.00	
Janibell 330R	22.2 Liners*	\$5.69	\$126.32	\$173.68

*15 briefs per bag x 30 bags per liner = 450 briefs per liner. 10,000 briefs per month / 450 = 22.2 liners per month

Why Nursing Homes and Assisted Living Facilities Are Switching to Janibell®

Janibell® was designed with your needs in mind. Janibell®:

Reduces Materials Costs

No more individually bagging each soiled brief. Plus, because Janibell's bags can be made to any size, an entire garbage bag won't be wasted if the trash is taken out before the container is full.

Saves Staff Time

CNAs can quickly dispose of the soiled brief while in the resident's room. No opening and sealing bags, no traveling down the hall.

Keeps Rooms Smelling Fresh

Thanks to their tight-sealing, self-closing lids, Janibell trash containers lock in odors and keep waste out of view.

Is Completely Hygienic

Hands-free, "step and drop" operation...non-porous ABS surface construction...and a completely enclosed internal bag liner that eliminates bag overhang and the bacteria and pathogens it can harbor.

Meets Health & Safety Code Standards

Designed to be an important part of your infection control program, Janibell is compliant with all federal and state guidelines for waste isolation and removal.

Looks Attractive

Aesthetically appealing, Janibell helps you create a more home-like atmosphere for your residents.

Is Eco-Friendly

Bag liners are 100% biodegradable and made from 20% recycled materials.
