

## Experience the CosmetiCare Difference

Why do so many bariatric surgery patients choose CosmetiCare as part of their after-care plan? Because they appreciate our...

- **Expertise** – In cosmetic surgery, the end results depend primarily on the skill of the surgical team. Since we opened our doors in 1982, our Board Certified plastic surgeons have successfully completed over 100,000 procedures. We can help you, too.
- **Reputation** – Choose one of the most recognized names in aesthetic services nationwide. We specialize in face, breast and the body.
- **Sensitivity** – Rest assured that we are committed to always treating you with compassion, respect and understanding, while creating a comfortable atmosphere for you. Our goal is to ensure that every interaction you have with the CosmetiCare team is both supportive and positive.
- **Quality** – Your treatment will be provided by the highest credentialed physicians, working with fully licensed providers. You'll get the best care and you'll benefit from our ongoing investments in training and technology, and the fact that we only use the highest quality equipment in our work.

## Proven Results

Our team of surgeons, nurses, and office staff have been featured on many television shows and news stations. We have been featured as experts in our field on hit shows including:

## Dramatic Weight Loss Brings Dramatic Changes

Until you experience it, it can be hard to comprehend just how much life changes after you lose a significant amount of weight. Chances are you feel better, have more confidence, and are able to more easily participate in activities that were difficult (if not impossible) for you before. Your face and body look different. Strangers react to you differently. You may even react to yourself differently, such as seeing your reflection and wondering who that thinner person is.

Bariatric surgery can help you make dramatic changes in your life. But there is one aspect of major weight loss that most people don't think about: the reality of the bumps, sags and flaps of excess skin that often remain after the weight is gone.

### Get the help you need to look your best

The good news is that when you're ready, the experts at CosmetiCare have a variety of options to help you complete the last leg of your weight loss journey. Get rid of the excess skin, lift up anything that is lower than you want it, transfer fat to areas that now need it, and enjoy life to the fullest in the fabulous new body that you've been working so hard to create!

## Body Contouring for a Fabulous You

When you're ready for the final leg of your weight loss journey, count on your CosmetiCare team to get you over the finish line.

Be rid of all that excess skin, whether it's on your belly, back, thighs, neck or arms. Let us lift up your breasts, and make them the size you desire. Walk away from droopy thighs, wave goodbye to your sagging neck and upper arms, eliminate the stretch marks and remove stubborn pockets of fat deposits.

### Get your confidence back

You deserve to absolutely love the way you look and feel. Your body and skin contouring treatment plan will be designed to address your concerns, and help you get to where you want to be. Relax knowing that nearly all of our surgical procedures are done on an outpatient basis, and many only require light sedation. Plus, some procedures—such as CoolSculpting—do not require any surgery at all.

## A Fun Way to Envision How Good You'll Look

Having a hard time picturing what your body might look like after your treatment is through? Use our unique Visualizer to "try on" a procedure for free. Simply upload your photo and specify which procedure you're considering. You can do this from anywhere, including your home or our office. Within 24 hours the Visualizer will generate an image that will give you a much better understanding of the intended results of your desired procedure. While your actual results will certainly vary from this image, it's a fast and fun way to "try before you buy!"

## Financing that Fits Your Budget

If your desired procedures are not covered by your insurance plan, don't worry — CosmetiCare has you covered! We work with several different healthcare financing organizations (CareCredit, Alphaeon Credit, and others) to ensure that credit is available for nearly every patient.

- **Lots of options** – Including no-interest 24-month financing, choices that let you stretch your payments out for up to five years, and plans for those with challenging credit situations.
- **Ability to "bank" your payments** – Start making payments before your bariatric surgery, and have a big chunk of your after-care procedures paid for by the time you finish losing weight and are ready for body contouring.
- **Easy process** – Apply online or in our office and get an answer in just minutes. Funds can be made available immediately, and approval is just one click away!

## FAQs

### I have lost 150 pounds. What will it cost to remove my excess skin and stretch marks?

The answer depends entirely on the specifics of your situation. Is all of the excess skin just on your belly, or is it also in other areas, too? Will you need a breast lift? And so forth. For a customized cost estimate, call today to schedule a free consultation with one of our trained Patient Care Coordinators.

### How long does it take to heal after removing the excess skin?

Most people are walking that evening, have drains for about a week, can drive after 7 to 10 days, and resume most normal activities after about 2 weeks (with no strenuous exercise or activities for 4 to 6 weeks). Your situation, of course, may vary from this.

### Which is better: A full lower body lift, or a tummy tuck and then a lower body lift?

A full lower body lift (thighs, hips, butt) can be done at the same time as a tummy tuck. Your surgeon will evaluate your specific case and concerns, and recommend the best treatment plan to achieve your goals.

## What Others Say about CosmetiCare

"I am more confident and most importantly comfortable with my new shape."  
Catheryn Cervantes – Body Sculpting Patient

"The choice to get this treatment done at CosmetiCare was easy for me. Honestly, I would never think about going anywhere else. Dr. Niccole and his team are awesome! I have been a patient of Dr. Niccole's for over five years and he always goes above and beyond my expectations."  
Alicia Whitney – CoolSculpting Patient

"I feel sexier and more confident. It's a major boost in my self-esteem, and I have a waistline again! Not only did I feel I was in the best of care throughout the process from their staff, my doctor is a perfectionist. After seeing his work, I knew I was in the best of hands. Literally!"

Mary Tran – Tummy Tuck (Body Contouring) Patient
